EDUCATION

University of Kent

PhD student - Computer Science

Canterbury - Kent - United Kingdom

September 2023 - Present

Research: Enhancing the performance of training approaches in multi-agent reinforcement learning algorithms

University of Tabriz

M.Sc Mechatronics Engineering

Tabriz - East Azerbaijan - Iran

September 2019 - January 2023

GPA: 4.00/4.00 - First Rank among Graduate Students

University of Tabriz

B.Sc Mechanical Engineering

Tabriz - East Azerbaijan - Iran

September 2014 - September 2018

Grades: Engineering Mathematics : 19/20, Differential Equation: 20/20, Programming with Fortran: 18/20, Numerical Computation: 20/20, Statistics: 16/20

TECHNICAL SKILLS

Programming Languages: Python, Matlab, JavaScript

Libraries and Tools: Bash, PyTorch, Git, Github, Numpy, Docker, Gym, Epy Marl, Reflex

ML Architectures: Transformers, Attention, CNN

RL and Multi-Agent RL: Value function-based & Value Decomposition methods, Policy Gradient Methods, CTDE Training, Entropy-Based Training

WORK EXPERIENCE

Graduate Teaching Assistant

Canterbury, Kent, United Kingdom

September 2023 - Present

- Seminar and Class Supervisor: Foundation of Computing, Deep Learning, Machine Learning, NLP - Python

PROJECTS

- **NEAT visualizer** Neat (Neuroevolution of augmenting topologies) is an algorithm for evolving neural networks. A web interface for the evolutionary operation of NEAT is developed (A final project for one of the modules of my M.Sc degree) [GitHub](#)
- **Adding table version of VD methods to the Epy Marl library** Epy Marl is a library for training multi-agent reinforcement learning algorithms. This library is extended to incorporate the table version of VD methods, such as VDN, QMIX, MAVEN, Weighted QMIX, and ResQ, with an interface for facilitating the visualization of results in matrix games [Private Repo](#) (will be publicly available soon)

PUBLICATIONS

- The effect of attention in cooperative MARL environments with shared rewards (Neural Networks Journal) [Link](#)
- Decentralized training is a viable choice for training of multiagent systems (Submission Phase)

OTHER ACHIEVEMENTS AND EXAMS

- **B.Sc degree** Ranked among the top 3% of 230,000 students nationwide in Iran's 2014 University Entrance Examination
- **M.Sc degree** Government Scholarship to pursue my Master degree
- **PhD scholarship** United Kingdom and United State
- **GRE** 317 - (Q:165 (85 percentile), V:152)
